PROJECTS

Food-Pile Management System (10/2020 – 11/2020)

Application used: NetBeans IDE, MySQL, XAMPP Apache, phpMyAdmin.

- ⁿ This project is a window-based application of selecting food items based on their choice. This has a login and register feature for both admin and the users.
- ⁿ User can create his own food inventory and have CRUD facilities (Create, Read, Update, Insert and Delete). Search and sort the food items according to its price and name, save the changes.

Food-Snake Game (06/2021 – 06/2021)

Languages used: HTML(with media-queries), CSS, JavaScript.

- Food-Snake is a snake game where a snake moves within a boundary and grows longer as it eats food and score points.
- [□] (It can be played on phone as well as on desktop).
- ^a If the snake runs into its own tail due to turning too sharply or hits the boundary of the board the game is over.
- ⁿ The player eats as many food balls as possible to increase his score, each food ball gives 50 points.
- ⁿ The game is full of graphics having pleasant music at the background during the game and sound of game over as soon as the game ends.
